

Synergy

O'NEAL INDUSTRIES FAMILY OF COMPANIES

Family

Family is synonymous with synergy at O'Neal Industries (ONI). As part of the nation's largest family-owned group of metals service centers, each ONI company has the strength, backing, and unwavering support of all the others. Separately, we're leaders in our fields. But combined, our capabilities are exponentially enhanced. And that translates to maximum value for you when you make the ONI companies your one-stop shop for all your metals needs.

Ties

Together we stand to offer customers exceptional breadth and depth of inventory. Together, we offer unprecedented product and processing expertise. Together, we offer access to more than 70 strategically positioned facilities in North America, Europe, and Asia for fast, efficient distribution. Together, we serve customers ranging from job shops to OEMs. Family matters. And nothing matters more to the O'Neal Industries Family of Companies than pooling our resources to bring added value to our customers in each and every way.

ONI

Based primarily on product lines and industries served, the ONI companies are organized into two distinct groups: the Industrial Metals Group (IMG) and the High-Performance Metals Group (HPMG). Companies within a group often work with each other, and sometimes across group lines, whenever there is a specific benefit to the customer such as providing expertise for certain applications or enhancing the speed and efficiency of your supply chain.

Industrial Metals Group

Built On Reliability And Relationships

O'Neal Steel, founded in 1921, is headquartered in Birmingham, Alabama. O'Neal Steel supplies a wide range of carbon and alloy steel, stainless steel and aluminum products for companies nationwide. In addition, the company offers value-added processing capabilities tailored to market needs, all while providing high levels of customer service. O'Neal Steel's industry leading e-commerce platform, PRONTO®, provides continuous access to inventory, pricing, and ordering. O'Neal Steel conducts business with the highest degree of integrity, fairness, honesty and reliability. onealsteel.com

AN ONI COMPANY

Let's Build Things®

Complex Fabrications To Your Exact Specifications

O'Neal Manufacturing Services (OMS) is a supplier of fabricated metal components and welded assemblies. OMS provides highly integrated, comprehensive manufacturing solutions to customers who build equipment and manage projects that shape the world we live in – ranging from locomotives to forklifts and bulldozers to power generation equipment. Founded in 1921, With multiple manufacturing facilities strategically located throughout North America, we support original equipment manufacturers who build their industrial equipment in the U.S. by supplying them with superior customer service and quality contract metal manufacturing. Our contract metal fabrication offerings include steel fabrication, tube processing, plasma & laser cutting, metal forming, welding, machining and more to support global OEMs. onealmfgservices.com

The Strongest Name In Steel

Leeco Steel (Leeco) stocks and sells steel plate, maintaining one of the largest inventories of carbon, High Strength Low Alloy (HSLA) and alloy plate steel coming from premier mills worldwide. Founded in 1882, Leeco has 11 strategically located distribution centers in North and Latin America that are stocked with huge quantities of carbon- and heat-treated steel plate in a variety of lengths and thicknesses. Additionally, Leeco supplies large-quantity steel products to companies around the world via its expert Trading division. Leeco offers exceptional quality, an expansive inventory, expert service and on-time delivery, and carries specialty grades that often are not available from other distributors. leecosteel.com
